All Season Nails Wipe-Less UV Gel Seal Formula for Better Performance

The safe, full surface cure gel!

Valencia, CA – August 1, 2011

Staying ahead of the game is important and every so often new technology comes along and it's time to evaluate how products are selling and performing. Since updating the formula in 2009, the UV gel seal has become a great seller! Thus the need of a professional size! All Season Nails has come out with a new 2.5oz professional size (in an ergonomical patented tilt bottle) of the UV Gel Seal. The new size is 5 times more product compared to other ½ oz. brush-on formulas. The new formula still has the brilliant shine of a gel but is a thin viscosity brush-on polish formula!

The UV Gel Seal Wipe-Less formula combines a number of application steps into one easy step. The formula is self-leveling, so filing time is reduced and buffing is virtually eliminated. It also provides a solid seal that reduces lifting, peeling and cracking on any gel, wrap or acrylic application. The UV Gel Seal also works as a basecoat – important because it prevents chipping and staining from bright nail color. The UV Gel seal is also perfect for pedicures; nail art acrylics, wraps and gels! Just cure for 3 minutes and voilà! It's even guaranteed not to yellow under the sun's harshest UV rays. When it comes to extending the life of your clients' artificial nails, nothing does that better than the new UV Gel Sealer!

The most significant benefit of All Season Nail's UV Gel Seal is to the nail technician – the gifts of time and comfort. The product combines buffing and sealing which saves precious time (and money)! And no more painful repetitive wrist motions from buffing or fatigue from gripping nail tools. All Season Nail's UV Gel Seal is truly a workhorse in a bottle. If you haven't already, make this invaluable product a part of your entire artificial nail service line.
